

The safety-driven telematics solution.

GuideOne is proud to offer a new GuideVantage service, Azuga, for your organization's telematics solution. Azuga is used by both large and small organizations to improve their operations, safety and reporting practices. By installing Azuga's telematics in your organization's vehicles, you can reduce the risk of accidents, deliver better customer service and ensure your drivers' safety every day.

Azuga's telematics is easy to use – just plug it in to your vehicles. Offered at a discounted rate, installation is easy and avoids any downtime. With Azuga, you'll have access to a dashboard that displays telematic reports and real time alerts essential to your organization. In addition, Azuga will assist with on-boarding and account configuration.

In the Azuga portal, you can:

- + Monitor driver behavior and safety
- + Manage fleet operations across the country
- + Track fleet health and vehicle maintenance alerts
- + Observe vehicles through mobile reporting
- + Receive real-time alerts about vehicle usage
- + Rely on customer support for smooth operations

With the help of Azuga and GuideOne's risk managers, you'll operate with a safer, less costly and more efficient workforce on the road.
